

## **#1337 America as Media-Persia, II – The 6-month change: Introduction**

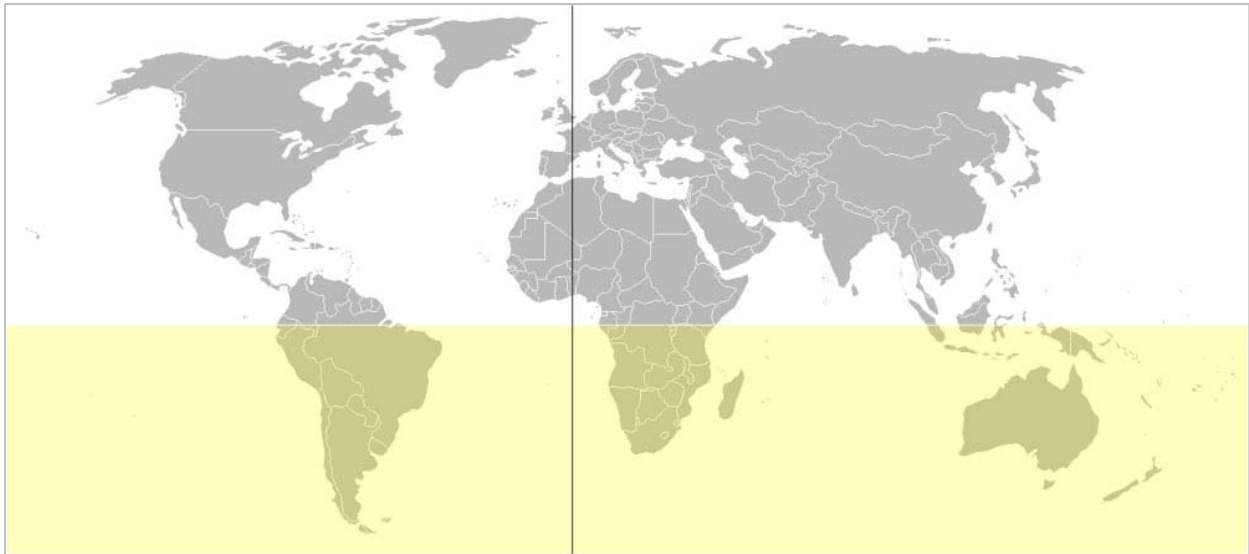

**The 2-month and 11-day date changes.** We have previously introduced and discussed what we have called the 2-month as well as the 11-day date changes.

The **2-month date change** was introduced in Unsealing [#242](#) *“Change Times”* and *Time Changes – The 2-month date change in history: Why December comes from *deca*, meaning 10, but is the 12th month.* We have applied it many times since.

The **11-day date change** was introduced in Unsealing [#243](#) *“Change Times”* and *Time Changes – The 11-day date change in history: Why George Washington was born on February 11, 1731, and February 22, 1732.* We have applied it several times since.

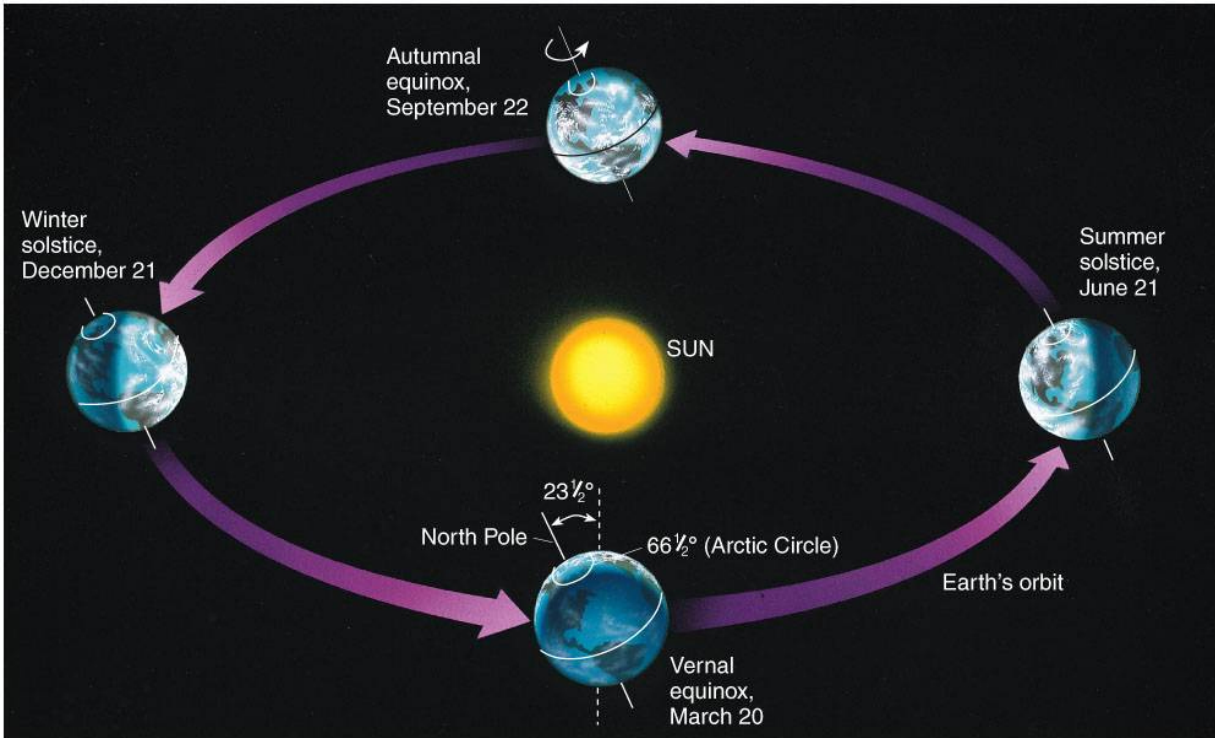

*Daniel 7:25 (KJV) And he shall speak great words against the most High, and shall wear out the saints of the most High, and **THINK TO CHANGE TIMES AND LAWS**: and they shall be given into his hand until a time and times and the dividing of time.*

**Key Understanding: The 6-month change.** It is now time to introduce the **6-month change**, which works within the Lord’s prophetic design in a manner similar to the 2-month date change and the 11-day date change.

**The premise behind the 6-month change.** The premise behind the 6-month date change involves the aspect of the two hemispheres, the northern hemisphere and the southern hemisphere. Simply, events in the northern hemisphere are “equivalent” to events that are 6-months apart in the southern hemisphere. For example, the winter solstice in the northern hemisphere is around December 21-22, while the winter solstice in the southern hemisphere is around June 21-22. Or, it can be expressed in this manner: the December 25<sup>th</sup> celebration of Christmas is observed in the middle of winter in the northern hemisphere while it is simultaneously being observed in the middle of summer in the southern hemisphere. Or, it can be expressed in this manner: if it was agreed upon by a man in the northern hemisphere to meet with

a man in the southern hemisphere on the date of the spring equinox, the man in the northern hemisphere would show up on March 21-22, while the man in the southern hemisphere would show up 6-months earlier, or later, on September 21-22. "I thought you said we were meeting on the date of the spring equinox!"
