

#1364 America as Media-Persia, II – Why the Shah’s exodus from Iran was on January 16 (1979), part 1, Military Time

Overview: In Unsealings [#1360–#1363](#), for the sake of continuing on with the subject matter of the media being prophetically associated with America as Media-Persia, we jumped from the 1991 Gulf War, which was an *incomplete* defeat of the Saddam Hussein regime (in the role as *pretender* Babylon the Great) by George H. W. Bush, to the 2003 Iraq War, which represented the *complete* defeat of the same Saddam Hussein regime by George W. Bush. **Now we are returning to the subject matter of the Shah of Iran’s departure from Iran on January 16, 1979**, which became prophetically linked to the eventual 1991 Gulf War between the U.S. (and the United Nations) and Saddam Hussein-led Iraq.

January 15, 1979. One (1) day before his departure from Tehran to Egypt, the Shah stood in front of a statue of Reza Shah I in one of the rooms at the Niavaran Palace and expressed his regrets for deciding to leave Iran and said farewell to his father.

Review: We have studied a number of instances where the Lord uses the time of day (2:41 a.m., May 7, 1945, fulfilling Daniel 2:41, as discussed in Unsealing [#87](#); 8:32 p.m., April 2, 1917, as a counterfeit fulfillment of John 8:32, as discussed in Unsealing [#870](#)) or the date/year (July 8, 1776, fulfilling Daniel 7:8, as discussed in Unsealing [#3](#); the year 1708 fulfilling Revelation 17:08, as discussed in Unsealing [#1](#)) for the purpose of revealing the fulfillment of prophecy.

Military time and time of day. If “regular time,” such as 2:41 a.m., can reveal a verse such as Daniel 2:41, then *military time*, such as 1441 (2:41 p.m.), can also reveal a verse. The Lord ordained the surrender of Germany to the U.S. and the United Nations to occur at 2:41 a.m., May 7, 1945, for the purpose of revealing its fulfillment of Daniel 2:41. If the surrender had occurred at 2:41 p.m., instead of 2:41 a.m., the time of surrender would be rendered as 1441 military time. And, just as the Lord used 2:41 a.m. to reveal and fulfill Daniel 2:41, he could have also used 1441 military time (2:41 p.m.) to reveal and fulfill Daniel 2:41.

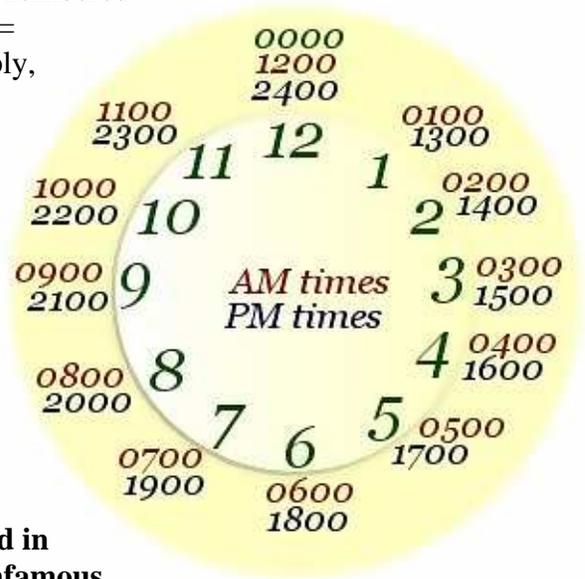

To bridge to the next paragraph, let’s see that 7:08 a.m. could be used to fulfill a verse such as Daniel 7:8, and, furthermore, the date of July 8, or 7/08, could also be used to fulfill a verse such as Daniel 7:8. In other words, either the time of day or the date can be used by the Lord to correlate with a verse. But remember, at the moment we are deepening our understanding of the Lord’s use of *military time*.

Military time and date/year. Just as the time of day of 7:08 a.m. (or 7:08 p.m., or 1908 military time), or the date of July 8 = 7/8, might be seen in the fulfillment of Daniel 7:8 . . . the time of day of 1:16 a.m. (or 1:16 p.m., or 1316 military time) is tied to the date of January 16,

and can fulfill a verse numbered as 1:16 or (and this is the key) 13:16. Do you see how the date of January 16 and 1316 military time go together, and might correlate with a verse such as Exodus 13:16?

1316 military time = 1:16 = January 16. The *military time* aspect of the Lord's correlation of historical events with scripture is such that a verse numbered 13:16, such as Exodus 13:16 or Revelation 13:16, = 1316 military time = 1:16 p.m. = January 16. Simply, that is how it works.

Key Understanding: *The Lord's correlation of military time with the numbering of scripture verses. Through the military time aspect of the Lord's correlation of the dates and times of historical events with the numbering of scripture, verses numbered 13:16 correlate most easily with the date of January 16, because 1316 military time = 1:16 p.m. = 1/16 as a date, or January 16 (using the American date format). Again, 13:16 = January 16. The understanding of that will aid in explaining why the Lord ordained the Shah's infamous exodus from Iran to occur on January 16.*
